Guanrui Li

Professional Experience

2024.Aug-present **Assistant Professor**
Worcester Polytechnic Institute (WPI), Robotics Engineering.

2024.Feb-Aug **Postdoctoral Researcher**
Agile Robotics and Perception Lab.
Advisor: Prof. Giuseppe Loianno, University of California, Berkeley

2018-2019 **Research Associate**
AirLab, Field Robotics Center.
Supervisor: Prof. Sebastian Scherer, Carnegie Mellon University, Robotics Institute

2017-2018 **Research Assistant**
ModLab.
Supervisor: Prof. Mark Yim, University of Pennsylvania, GRASP Lab

Education

2019-2023 **Ph.D. in Electrical and Computer Engineering**
New York University (NYU).
Advisor: Prof. Giuseppe Loianno, University of California, Berkeley, EECS

2016-2018 **Master of Science and Engineering in Robotics**
University of Pennsylvania (UPenn).
Advisor: Prof. Mark Yim, Prof. Vijay Kumar, University of Pennsylvania

2012-2016 **Bachelor of Engineering in Theoretical and Applied Mechanics**
Advisor: Prof. Jianliang Huang, Prof. Yun Bao, Sun Yat-sen University

Grants

Amazon Robotics: New Professor Grant
Role: **PI**. One-time new professor research grant, $200,000 awarded across recipients. *Period:* 2026–2027. *Amount:* $50,000.

Amazon Robotics: Closed-Loop, Autonomous Task Scheduling and Safe Navigation in High-Density Warehouses
Role: **PI**. Co-Investigators: Kevin Leahy (WPI), Carlo Pinciroli (WPI). *Period:* 2025–2026. *Amount:* $\$75,273$.

Amazon Robotics: Optimal and Safe Robot Learning through Differentiable Physics Using Differentiable MPC and CBF
Role: **Co-PI**. PI: Wei Xiao (WPI). Worcester Polytechnic Institute. *Period:* 2025–2026. *Amount:* $\$75,273$.

Awards and Recognitions

2024 **NYU University-Wide Outstanding Dissertation Awards**

2024 **Alexander Hessel Award for the Best Ph.D. Dissertation in Electrical Engineering**

2023 **NSF CPS Rising Stars**
A selective academic workshop (34 out of 117 applicants) sponsored by the Natural Science Foundation (NSF) Cyber-Physical System (CPS) program, which aims to identify and mentor outstanding Ph.D. students and postdocs who are interested in pursuing academic careers in CPS-related areas.

2022 **Outstanding Deployed System Paper Award Finalist at IEEE ICRA**
For the paper "Learning Model Predictive Control for Quadrotors".

2022 **Dante Youla Award for Graduate Research Excellence at NYU Tandon**
Research Award for outstanding Graduate at NYU Tandon School of Engineering.

2021 **Microsoft Research PhD Fellowship Finalist**
One of two students nominated by the ECE department at NYU.

2019 **Dean's PhD Fellowship at NYU**
Two-year fellowship with annual stipend of $36000 and an additional bonus award of $3000 for research.

2016 **Honors Undergraduates at SYSU**
Honors Undergraduate students with the strongest academic records at the Sun Yat-sen university.

2016 **Outstanding Undergraduate Thesis paper**
One of the two undergraduate theses awarded by the theoretical and applied mechanics department at SYSU.

2016 **Fung's Scholarship**
A HK$5000 scholarship sponsored by Victor and William Fung Foundation for undergraduates from Mainland China selected to exchange at the University of Hong Kong.

Media Coverage

2022 **Learning Model Predictive Control for Quadrotors**
The research video of my paper "Learning Model Predictive Control for Quadrotors" is featured in **IEEE robotics blog post**.

2021 **Low-Cost Drones Learn Precise Control Over Suspended Loads**
IEEE news article reported my research paper "PCMPC: Perception-Constrained Model Predictive Control for Quadrotors with Suspended Loads using a Single Camera and IMU". **DroneDJ**, **NYU Tandon News** followed up with this article as well.

2021 **Cooperative Transportation of Cable Suspended Payloads with MAVs**
The research video of my paper "Cooperative Transportation of Cable Suspended Payloads with MAVs" is featured in **IEEE robotics blog post** .

2021 **ModQuad: The Flying Modular Structure that Self-Assembles in Midair**
Wevolver featured the ModQuad research project video on their blog posts.

2018 **These Drones Stick Together: Daily Planet**
Discovery Channel reported the ModQuad project on their Daily Planet Program.

Academic Services

Professional Society Service

2026-present Associate Co-Chair, Technical Committee on Aerial Robotics and Unmanned Aerial Vehicles, IEEE RAS

Editorial Services

2024-present Associate Editor, IEEE Robotics and Automation Letters (RA-L)

2025-present Associate Editor, IEEE International Conference on Unmanned Aircraft Systems (ICUAS)

2025-present Associate Editor, IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS)

2027 Area Chair, Robotics: Science and Systems (RSS)

Conference and Workshop Organization

2026 Organizer, Multi-Robot Autonomy Workshop, NSF FRR PI Meeting, 2026

2026 Lead Organizer, Why Rust for Robotics: A Perspective From Industry Workshop, IROS, 2026

2025 Organizer, Embodied-AI for Aerial Robots Workshop, ICUAS, 2025

2025 Lead Organizer, Rust for Robotics Workshop, ICRA, 2025

2022 Session Chair, Aerial Robotics IV, ICRA, 2022

2022 International Conference on Unmanned Aircraft Systems (ICUAS)

2020-2021 IEEE International Symposium on Safety and Rescue Robotics (SSRR)

Teaching Experience

2025 **Instructor**

RBE 595: Optimal Control, WPI

This course introduces students to the fundamentals of optimal control with a focus on applications in robotics. We begin with foundational concepts in convex optimization, including quadratic programming, which form the basis for many control algorithms. Building on this, students will learn classical optimal control methods such as the Linear Quadratic Regulator (LQR) and Model Predictive Control (MPC). The course then extends to nonlinear MPC, with applications to trajectory planning and control in robotic systems. Finally, we explore emerging learning-based approaches that combine data-driven modeling with optimal control principles, highlighting their potential and limitations in robotics contexts. Throughout the course, theoretical understanding is reinforced with practical examples and assignments involving real or simulated robotic platforms.

2024 - 2025 **Instructor**

RBE 502: Robot Control, WPI

Designed and delivered lectures on robot control throughout the semester, emphasizing the intersection of control theory and robotics. Developed and taught topics including linearization, state-space modeling, feedback control, Lyapunov stability analysis, nonlinear system control, trajectory and motion planning, compliance and force control, impedance control, adaptive control, and robust control. Guided students through hands-on projects focused on simulating and implementing control systems for robotic manipulators and mobile robots.

2019 - 2022 **Guest Lecturer**

ROB 6003: Foundation of Robotics, NYU

Instructor: Prof. Giuseppe Loianno

Gave 1-2 lectures every Fall semester on dynamic model of a robot arm, using the Lagrange approach and Newton-Euler approach.

2017 **Teaching Assistant**

MEAM 510: Design of Mechatronic Systems, UPenn

Instructor: Prof. Mark Yim and Prof. Paul Stegall

Held regular office hours.

Answered students' questions on basic electronics and microprocessors.

Modified a radio-controlled toy excavator to a WiFi-controlled robot for final project prototyping.

Coached a 16-student team to win the first robot MOBA competition in the course.

2017 **Graduate Teaching Assistant**

edX: Robotics: Dynamics and control, UPenn

Instructor: Prof. Ani Heish and Prof. Vijay Kumar

Moderated discussion forums and answered students' questions on the lab assignments.
Checked and fixed the course slides on linear and nonlinear control.
